

MB 360 UC

Work your way

MB 360 UC is a double-sided, Bluetooth® headset with Active Noise Cancellation that reduces background noise to increase work focus. Designed for today's style conscious office workers on the move, who prefer to use a single headset for both calls and entertainment - without compromising on business performance or audio quality.

Ideal for working in collaborative, often noisy environments, the MB 360 UC's Active Noise Cancellation improves concentration by reducing distracting background noise. An over-the-ear design and deep, ergonomic ear pads add noise damping and long lasting comfort for the most extended of listening sessions.

The combination of refined Sennheiser music performance with its rich details, vividness and powerful bass and the benefits of UC productivity gives today's active employees the flexibility they need in one great looking headset.

UC optimization and Skype for Business certification ensure that users can both hear and be heard clearly on calls. The MB 360 UC's discreet styling, signals quality when worn both in and out of the office, and its long battery performance lasts right through the workday - and commute.

Comes with USB dongle for softphone/PC, USB cable for charging, 3.5 mm jack cable for mobile use and a storage pouch that keeps your headset protected on the go.
