

Nutri**pferd**[™]
natural from the Sea

*Reduce skin
and metabolism
problems - proved*

only
10 g/day

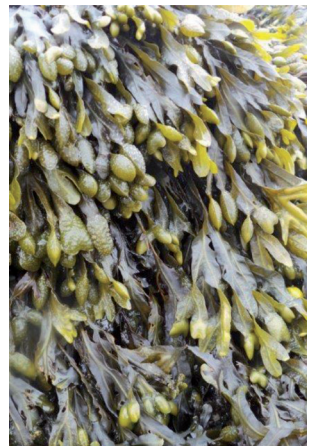

The raw material for our seaweed-based product is growing in the deep waters of the Atlantic Ocean where the water is cold and clear. The seaweed which we use is specially prepared and concentrated to result in our «Algae micronate» powder, and contains multiple trace elements, electrolytes, vitamins, amino acids and minerals, which are often absent in the ill balanced animal diet. This can, in extreme circumstances, result in chronic deficiency diseases.

NUTRIPFERD helps restore the body's natural balance.

As it takes skin cells about 28 days to renew, you cannot expect miracles overnight, but positive changes can be seen after about 3 - 4 weeks.

NUTRIPFERD nutritionally maintains the systems that:

- ✓ Prevent against allergic reactions and skin irritations, such as sweet itch
- ✓ Boost the immune system
- ✓ Stress is reduced
- ✓ Lower the susceptibility to disease
- ✓ Activate the micro flora of the intestine tract
- ✓ Metabolism is improved
- ✓ Produce a visibly more beautiful coat

Natural Help from the Sea

Natural Bio Stimular™ NBS Spray Insect Repellent

Protection against horse fly, mosquito and flies!

Beneficial to our Friends - Cruel to Molesting Insects!

Troublesome insects can spoil otherwise beautiful days – for horse and rider. Therefore, we have to fight back.

We do not have to kill the insects. It is sufficient to keep them at a distance. Therefore substances are welcome, which will not irritate horse and rider, but still have a significant repellent effect on these irksome biting and molesting creatures.

Not all products smell agreeable. For humans it is not a big problem, you can manage most of the time but for horses it is more difficult. They cannot get rid of not taking care of their coat.

We have developed a repellent natural mix from protective, soothing and fine selected essential oils, combined with a special substance worldwide well-known, not only for horses.

A comparison test of the German Foundation Stiftung Warentest, resulted in showing the best repellent result of a Icaridin / Saltidine substance (Autan). It was elected as Number one repellent!

NBS Insect Repellent contains 20% Saltidin (Icaridin), plus Neem extract and natural protective and soothing oils.

HOW TO USE:

NBS Spray Insect Repellent can be used several times per day according to need.

The product is also suitable for horses with sensitive skin and can as well be used by the rider. Avoid eyes, nose and eventual open wounds. Test on small surface before using on white horses.

NBS Insect Repellent is available in 5 litres jerry-cans, 500 ml or 100 ml bottle with an economical pump spray with micro-diffuser.

Natural Help from the Sea

Natural Bio Stimular™ Soothing Oil for Horses

When summer comes, some riders see their horses suffer. Against effects of sweet itch, it seems everybody struggles in vain. But there is some relief possible.

Natural Bio Stimular for Horses - Soothing Oil for Horses -

Natural Bio Stimular (NBS) soothing oil is based on a special composition of cod liver oil and selected plant oils. It is odourless and easy to apply.

NBS soothes the skin optimal even in case of existing skin impurities, tetter, impetigo and dandruff. Risk of rough and irritated skin is reduced. NBS Soothing Oil makes the coat, mane and tail shiny.

Hairless skin is a dread to horses suffering from sweet-itch. NBS has the well known good actions of cod liver oil for external use. It reduces itching immediately and helps to regenerate skin cells.

HOW TO USE:

NBS is applied directly and undiluted to the affected areas. Apply once or twice daily in accordance with needs.

A positive reaction can be seen within short if used regularly. One litre is sufficient for the whole summer most of the time.

You have equally the possibility to feed your horse with **NUTRIPFERD™** in order to take care of the coat of horse and to decrease areas with problems. Order Natural Bio Stimular now!

Help your horse - your friend!

Recommendation: Combine in summer season NBS Soothing oil with Nutripferd.

Natural Help from the Sea

Natural Bio Stimular™

Sea algae micronate for Dogs & Cats

All these positive reactions will be naturally activated within some weeks. The animals will be even balanced; however, their character does not change.

NBS Sea algae micronate **Natural Bio Stimular™** is a high concentrated sea algae powder containing naturally various amino acids and minerals. On this basis the general condition is definitely improved.

You can see the effect in any life cycle.

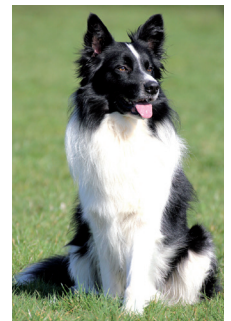

DOSING:

We recommend:

- for dogs $\frac{1}{2}$ g = sprinkled over the feed per day per 15 kg body weight.
- cats get $\frac{1}{4}$ g = a pinch.

The powder can be sprinkled over the feed. A jar contains 100 g and is usually sufficient for 250 days for a dog and 500 days for a cat. Small quantities needed for high effect. Cheap and useful.

Natural Help from the Sea

Feed all round!

FEED RECOMMENDATIONS AND TRICKS:

It may sometimes happen that horses dislike the strange smell of NUTRIPFERD™ and are difficult to persuade eating it.

- ✓ The first time feed 10 g combined with apple or beet root by hand.
- ✓ Start eventually with smaller quantities and increase little by little to the needed 10 g.
- ✓ Use taste improving additives like carrot juice, or else.
- ✓ Use eventually fennel honey
- ✓ When feeding NUTRIPFERD™ with mash, wet all to avoid that the horse is puffing away.

Nutripferd™ can reduce feed supplements based on minerals or vitamins.

Poor eaters will finally accept the unknown taste. If you have questions or proposals, please contact us.

Recommendation:

Use our test pack or order the economic combination Nutripferd™ and Natural bio Stimular™ for 6 or 12 months.
